

# What Spiral Water T1000s Do for Membranes, DAF, MBR Systems

Automated Pretreatment Using Spiral Water Model T1000 High and Variable TSS Filtration Ahead of DAFs, MBBRs, UF and Other Membranes Makes the Downstream Biology Far Steadier and Cleaner.

## Why Spiral Water Technologies T1000?

Improves Downstream Equipment Overall Equipment Effectiveness

Spiral Water Fine Pre-Filtration T1000 (25 micron) Removes 50%-60% Total Suspended Solids (TSS)

Increases Liquid Volume for Biology

Higher MBR Maximum & Peak Flow Rates

10% to 25% Increase in BOD Remediation
